

There is every reason to scream

We can't face the crisis without you!

Veröffentlicht am 18.06.2026

2026 is considered the super election year.

In several federal states, state elections are pending. Elections are held in Saxony-Anhalt, Mecklenburg-Vorpommern and Berlin in September, where the AfD is ahead in surveys.

Changes by a governing AfD will have far-reaching consequences for the entire Federal Republic, including the people who are already suffering from the shift to the right. Migrants, refugees, women, queers, single parents, homeless and many more groups.

More about the intentions of the AfD in Saxony-Anhalt can be read in the "government program" of the AfD.

The clubs and groups that have so far taken care of these groups of people are also under an AfD government or are already doing so.

There is every reason to scream.

People who scream are quickly stamped and are seen as upset. It is often associated with weakness and loss of control. We want to turn this narrative around. We want to keep our voices loud and use them. To let out anger and scream, to draw attention to the crisis that is coming and the crisis that already exists.

Be it the care emergency, unreported domestic violence, European deportation policy or, more generally, the state of the world. We want to scream and sing to show that we still have a voice if we want. A voice for community, solidarity and equality. For a good life for everyone and without AfD.

If we have attracted attention through a joint loud screaming and singing, we want to draw attention with information material, stickers and banners that every voice that does not go to the AfD helps to maintain a democracy. Together we want to **Voices against the crisis!**

Where do we scream everywhere?

Regional

In Halle, the FANTIFA choir once again trains our voices at the Hallmarkt on 27.06.26 and we take up space for feminism, anti-fascism and humanity. There is the Flinta sprinter, snacks and a public choir rehearsal from 15:00 on the Hallmarkt.

Digital

In April we were able to spontaneously start a video project with the largest FLINTA choir in Europe, the D major dykes. You can see the result on Youtube and Instagram and should

make it clear beyond the election that we use our voices together and how beautiful we sound together.

Nationwide

In Bremen, Hamburg, Potsdam, Munich, rappers Bush.Ida and RAHSA share their stage in solidarity with us to draw attention to the crisis together. Because whether East or West: Fascist parties endanger our rights everywhere!
